Anaite Diaz Artiga, Director, Public Health & Epidemiology Program, Universidad del Valle de Guatemala: In 2010, we piloted the material of the basic level of the FETP.

CDC contributes not only with funding but also with technical expertise.

Daniel Sieden, Medical Veterinarian, Guatemala Ministry of Agriculture, Livestock & Food: You can make a great difference because our work is very important to human health and animal health.

Artiga: We have trained so far 15 veterinarians at the intermediate level. Two of them are graduates of the advanced level of the Central America Field Epidemiology Training Program.

Serrano: It benefit Guatemala because I can identify, I can do research and I can contribute to the health of humans.
